Debunked: California Real Estate Myths

OpportunityDb <info@opportunitydb.com>
to me ▾

Hi Jimmy Atkinson,

Jimmy Atkinson from OpportunityDb here. Occasionally, I send relevant sponsored email messages on behalf of my partners. Today's email comes from Urban Catalyst in San Jose, CA...

California is now home to crashing real estate and risky investments...

Or at least, that's what the news leads people to believe!

There's a lot of misinformation flying around. We've been working hard to [separate fact from fiction](#).

In 2021 we busted these top 3 myths about California:

- New office space won't be needed because [everyone will work from home](#) in the future.
- There's a [mass exodus](#) of people leaving the Golden State.
- Companies are [abandoning California](#) in droves.

Here in 2022 we're busy busting more myths— this time about investing in California commercial real estate.

Tech sector: from a 52% year-over-year increase in jobs to a \$171,000 average income, California is flourishing... and that's good news for real estate investors.

You can [read my full article "Mythbusters Revisited" here](#)
